2ND HOME?

SOMMARNÖJEN
SOMMARNÖJEN.SE

Hot off the drawing board from Swedish firm Sommarnöjen are these perfectly formed pre-fab summer houses. There are eight different designs to choose from, designed by three award winning prominent Swedish architects; Tham & Videgard Hansson (voted best Swedish architects 2008), Thomas Sandell and Kjellander & Sjöberg. The models are available in a chop and change variety of interiors and can be placed around the Scandanavian

seashores and lakesides (or your back garden if you can get the consents) ready made.

It's a perfect solution for the Scandanavians who regularly take weekends off to visit their second homes in the countryside. They can also become additions to your home as offices, studios or guest houses. The mini pads can also be fitted with saunas from Tylo and steamrooms and can be customised to suit specific needs. []
