Architect Visit: Beach Cabins from Sommarnöjen

From [Julie](#)

May 26, 2009

Discovered on last week's [Materialicious](#): prefab beach houses from [Sommarnöjen](#), a Stockholm-based company with the tagline "Small house. Great architects." The company commissioned a trio of well-respected Swedish architects—Sandell Sandberg Architect, Kjellander + Sjöber Architect Office, and Tham & Videgard Hansson Architects—to design 15-meter square cabins that can be used as guesthouses, saunas, offices, or studios. The houses are built by hand using local and sustainable materials and outfitted with fixtures and furniture by companies like Electrolux, Dux, and Kasthall.
